
Emergency Response

❖ Android App:

- Self CheckIN : (No of fellow passengers)
- Auto CheckIN : (Alarm Manager to Invoke Service - to save Battery Life)
- CheckIN on Someone's Behalf / Volunteer's Tablet
- SOS / Distress Reporting
- Local Storage of location history incase of no Cellular Network.

❖ Website : User & Admin

- Graphs
- HeatMaps
- SMS Notification

❖ Backend REST API's:

- REST & MySql
- JPA Hibernate

Future Enhancement

- ❖ **Creating an API to access location from Cellular Tower for non-SmartPhone Users**
- ❖ **Will use Sensors like Accelerometer to track approximate location incase of No Network**
- ❖ **Will Integrate with USSD / IVR service**
